calender year 1881, which has been ordered be made. printed, estimates the production of the dollar coming rate, \$48,800,000; total,879, - rocks. 600,000. This shows an increase over the yield of the previous year of about \$800,-000 in gold and \$2,400,000 in silver. The total deposits of gold at the mints during the year amounted to \$59,518,179, of United States bars, am unted to only of about \$100,000 per month.

To the amount d posited at the mints and the small amount exported might properly be added the \$600,000 worth of gold contained in the silver bullion exported, and also possibly \$700,000 undeposited gold in the form of nuggets, grams, etc., used \$350 per day. in ornamentation and \$200,000 m bars in private refineries used for similar purposes, ritory, produced \$501,555.51 in bullion the total debt of the United States at this which make in all an addition of about \$1,- during the year 1884. 500,000, but of the gold received from British Columbia and the northern States of Mexico, amounting to about \$1,100,000, only \$400 000 was deposited at the San Francisco Mint as foreign and the statements furnished by reliners show that it was refined by them and included in the refined bullion deposits at that mint under the head of domestic.
